EMPLOYMENT HISTORY

Software Developer

Innovex Solutions — July 2020 – Present

Worked on multiple full-stack projects for enterprise and insurance clients, involving both monolithic and microservices architectures. Key contributions include:

- **MyResque**
Accident scene management platform for towing, digital claims, and scene response.
Tech: Node.js (Express), MariaDB, Next.js, Angular, Firebase, AWS
- **Britam Insurance Health Portal**
Web portal for Britam's health insurance services including customer onboarding and claims.
Tech: Node.js (Express), MariaDB, Next.js, Angular, Firebase, AWS
- **Motor Policy Management System (PCPA)**
Centralized platform to manage vehicle insurance policies and compliance.
Tech: Python (FastAPI), PostgreSQL, Next.js (React), Docker
- **Valuation and Claims System (FLIP)**
System used for vehicle valuation, accident claims processing, and report generation.

Tech: Python (FastAPI), PostgreSQL, Next.js (React), Docker

Architecture: Microservices-based ecosystem with multiple independently deployed services

- Collaborated cross-functionally to design, develop, and deploy robust backend APIs and user interfaces.
- Led integration of third-party services and managed deployments on AWS, Firebase, and GCP.
- Wrote and maintained automated tests, ensuring high reliability and scalability of all systems.
- Contributed to infrastructure setup, CI/CD, and Docker-based containerization in microservices environments.
